Journal of Contaminant Hydrology, 12 (1993) 375–376
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 12, 1993

Publisher's Note 1

Research Papers

Improved three-dimensional finite-element techniques for field simulation of variably saturated flow and transport
S. Panday, P.S. Huyakorn (Herndon, VA, U.S.A.), R. Therrien (Waterloo, Ont., Canada) and R.L. Nichols (Aiken, SC, U.S.A.) 3

An approach to estimating uncertainties in modeling transport of solutes through soils
H. Zhang (Oak Brook, IL, U.S.A.), C.T. Haan and David L. Nofziger (Stillwater, OK, U.S.A.) 35

Passive sampling of groundwater monitoring wells without purging: multilevel well chemistry and tracer disappearance
R.M. Powell and R.W. Puls (Ada, OK, U.S.A. 51

Experimental observations of nonaqueous-phase liquid subsurface movement
R.J. Lenhard (Richland, WA, U.S.A.), T.G. Johnson and J.C. Parker (Blacksburg, VA, U.S.A.) 79

Quantitative evaluation of flushing and biodegradation for enhancing in situ dissolution of nonaqueous-phase liquids
E.A. Seagren, B.E. Rittmann and A.J. Valocchi (Urbana, IL, U.S.A.). 103

Microbial degradation of phenols and aromatic hydrocarbons in creosote-contaminated groundwater under nitrate-reducing conditions
J. Flyvbjerg, E. Arvin, B.K. Jensen and S.K. Olsen (Lyngby, Denmark). 133

Reduction of gasoline component leaching potential by soil venting
M.D. Annable, R.B. Wallace, N.J. Hayden and T.C. Voice (Lansing, MI, U.S.A.) 151

Numerical investigations of optimal well spacing and the effect of screen length and surface sealing on gas flow toward an extraction well
A. Gamliel (Warren, MI, U.S.A.) and A.S. Abdul (Knoxvile, TN, U.S.A.) 171

Announcements 193

Erratum 196

Guide for Authors

Research Papers

On the application of image analysis to determine concentration distributions in laboratory experiments
R.A. Schincariol, E.E. Herderick and F.W. Schwartz (Columbus, OH, U.S.A.). 197

Microscopic observation of a NAPL in a three-fluid-phase soil system
N.J. Hayden (Burlington, VT, U.S.A.) and T.C. Voice (Lansing, MI, U.S.A.) 217

Mixing cell models for nonlinear equilibrium single species adsorption and transport
K. Bajracharya and D.A. Barry (Nedlands, W.A. Australia). 227

Hydrogeochemical implications of groundwater contamination by road de-icing chemicals
K.W.F. Howard (Scarborough, Ont., Canada) and P.J. Beck (Markham, Ont., Canada) . . 245

A field experiment on cation exchange-affected multicomponent solute transport in a sandy aquifer
P.L. Bjerg and T.H. Christensen (Lyngby, Denmark) 269

Model simulations of a field experiment on cation exchange-affected multicomponent solute transport in a sandy aquifer
P.L. Bjerg (Lyngby, Denmark), H.C. Ammentorp (Hørsholm, Denmark) and T.H. Christensen (Lyngby, Denmark) 291

0169-7722/93/$06.00 ©1993 Elsevier Science Publishers B.V. All rights reserved.

Acid-generating salts and their relationship to the chemistrry of groundwater and storm runoff at an abandoned mine site in southwestern Indiana, U.S.A.
E.R. Bayless and G.A. Olyphant (Bloomington, IN, U.S.A.). 313
A density-dependent flow and transport analysis of the effects of groundwater development in a freshwater lens of limited areal extent: The Geneva area (Florida, U.S.A.) case study
S. Panday, P.S. Huyakorn, J.B. Robertson (Herndon, VA, U.S.A.) and B. McGurk (Palatka, FL, U.S.A.) 329
Outdoor experiments on enhanced volatilization by venting of kerosene component from soil
P. Fine and B. Yaron (Bet Dagan, Israel) 355
